PROFESSIONAL EXPERIENCE

WordPress Developer

Ditrop – United Kingdom | *September 2025 – December 2025*

- I developed a service cost calculator plugin for a major function on one of the company's website to extend site functionality
- The company has a product design team, I collaborated with the team to maintain the existing company's website, developed another website for a specific product the company is launching into
- I developed the company's website from scratch using wordpress, made it super responsive and compactible with different screen sizes
- I collaborated with different teams in the company as a developer to brainstorm and create useful and important functionalities needed on different websites, both built for the company and her clients
- I developed products, user interfaces & experience and visual assets using Figma as well as I implemented designs on Figma into functional websites

WordPress Developer

Mediv Consult – Nigeria | *Mar 2024 – Sep 2025*

- I designed and built a responsive website for the company using Wordpress, then implemented some functions using HTML, CSS, and JavaScript.
- I improved the website's UI accessibility and usability, leading to increased and better user engagement.
- I worked with company's clients to translate their business requirements into functional interfaces.
- Optimized website performance (speed, core-web vitals, SEO best practices and minified codes), improving load time and SEO ranking.
- I made researches on requirements requested clients to know how to best give and come up with a top-notch outcome on each projects

Website Developer

PowerWeb Design – Miami, USA | *Sep 2023 – Aug 2025*

- I created modern, user-centered, professional and sleek website layouts ensuring cross-device compatibility and responsiveness for the company's clients
- I conducted user research to align design decisions with client goals.
- Built responsive designs using HTML, CSS, and JavaScript for improved site accessibility.
- Supported SEO implementation to boost traffic and search rankings.

- I collaborated with the graphic designers to design high resolution logos and banners, which are meant to be used on clients websites
- I made researches on requirements requested clients to know how to best give and come up with a top-notch outcome on each projects

WordPress Developer

Elior Digital Agency – United States | Sep 2021 – Dec 2024

- I collaborated with the design team who were already on ground to revamp and improve the performance of the company's website
- I optimized the website to be compactible different screen sizes (screen size responsiveness)
- I worked with the company to develop and design websites for their clients, as the company happens to be a digital agency company
- I gave ideas on achieving good user Interfaces and experience to the design team and translated them into functional user interfaces
- I collaborated with the tech team to fully optimize the website for speed, and good performance

WordPress Developer

ProfitableChoice LLC – Nigeria | Mar 2020 – May 2024

- I developed the company's website from scratch using wordpress, made it super responsive and compactible with different screen sizes
- I implemented SEO best practices in the designs, these includes the use of H1, H2, H3 headings for structured SEO
- I conducted the keyword research that best matches the contents and purpose of the company's services, so that it could rank well on Search Engines
- I fully optimized the website for its best performance, I optimized the speed, core web vitals using light-house
- Finally I ensured to seal the security of the website using one of the top used security plugins in WordPress, which tracks and monitors every activities occurring on the website and picks out the dubious ones, marking them as spam and blocks the IP.
